

## Rocker chooses private financing - withdraws the listing

Rocker AB (publ) has decided to withdraw the company's intended listing on the Nasdaq First North Growth Market, which was to take place today, Friday 29 October. This despite the fact that the offer was oversubscribed already the first day after the prospectus was published.

- The listing is withdrawn because the board has decided that a private and secured round is the best for the company at the moment. It gives us the right conditions for continued growth, says founder and chairman of the board Dennis Ahlsén.

The main owner Schibsted will continue to support the company going forward.

- We believe that Rocker has all the opportunity to reach the goals and look forward to driving growth together within all areas; Rocker You, Rocker Pay and Rocker Buddy in both Sweden and the rest of Europe, says Richard Sandenskog, investment manager at Schibsted.
